

Revulsion In Agriculture Smart Solution For Greenhouse

Keep in touch:

www.SmartBeen.com | info@SmartBeen.com

About us:

We made smart assets for your greenhouse. You can manage all of greenhouse stuffs by smart sensors and remote access. Our first mission is taking care of greenhouse products with high tech devices. But don't worry, our products are easy to setup and use. We design them by DIY method. Which means you can turn your greenhouse smart by yourself without any additional payment for serviceman.

Don't worry about greenhouse fails anymore. SmartBeen will announce you. You can always monitor greenhouse's plant health status even by graph. You are not limited to just monitoring plant health, you got a smart power to check any installation in greenhouse such as: window status, air conditioners and watering system.

We save your investment:

Well we are not financier, but when you choose SmartBeen you will have a great co-worker for 24 hour a day, 7 days a week. SmartBeen never sleep. You buy and see a litter part of SmartBeen! Behind the small tools in your greenhouse we have a big team taking care of them.

Its time to rest and make a free mind.

Did you care about greenhouse temperature? Humidity? What about CO or CO2?! Okay we got it. SmartBeen will monitor your greenhouse environment with standard check points.

HERO!

Small thing of big think...

We know making full greenhouse with high technology is like building castles in the air... let's make renascence for smart greenhouse. HERO is our great path to do that. Simple, small, easy to setup and economic device for each type of greenhouse.

A simple device for monitoring air temperature, humidity and quality. You give some order to your greenhouse HERO for monitoring your greenhouse. If temperature is going down or humidity is going high we will notify you. Based on true story one of our customers lost more than \$100,000 in just a night because of air conditioner fail, after that we offered him HERO and till now HERO has notified the greenhouse owner 4 times.

You buy a HERO just for \$299 and make \$400,000 in just a year...

How it Works?

More Information About HERO

Sensor	Range	Accuracy
Temperature	-20 ~ + 80 °C	±0.2% ~ 1%
Humidity	0% ~ 100%	0.5% ~ 2%
CO2	0 ~ 10000 ppm	5%
Battery	<12 hour	±2

IoT for greenhouse:

By easiest way

Small Thing of Big Think...

Setup is easy! Just register in SmartBeen.com and add the specific code on each HERO box to your control panel. It looks like: xx-yy-zz

We combined temperature, humidity and air quality sensors together and made it safe for greenhouse usage. The included battery can notify you when electricity is down. That's very important because of water pump systems and other scheduled systems which can hurt your plants. HERO is a simple measure meter device.

First customer

This is our first real customer. His benefit of SmartBeen is more than \$400,000. His name is "AbdolAli". As you can see the first version/hand made version of SmartBeen.

Very big greenhouse

There are a lot of HEROs in deferent greenhouses. Big, small, hydroponic, even some of our customers have smart greenhouses with deferent brands but they are still using HERO.

Cute greenhouse

No size limitation, big or small, industry or home user! Any greenhouse type can be use our products. We design this for industrial greenhouse, but you can use it everywhere.

SmartBeen lab

We make all this greenhouse smart in just a few month, this is a begin. There is a lot of things that we should do. Greenhouses need more devices and more supports. HERO is the best start to turn greenhouse smart. We know the other necessary thoughts in greenhouse and we are working on them.

To see our deferent devices go to SmartBeen.com and enjoy it!
